What is Trading?

Trading is the act of buying and selling financial instruments, like stocks, currencies, or commodities, with the goal of making a profit from price fluctuations within a specific timeframe. It is the fundamental law of every economic system. Any country's growth capacity depends on the trade taking place in it. All kinds of commercial transactions occur in markets, including the stock exchanges for share trading

GLORIOUS FX

Benefits Of Trading

A trader can work for a financial institution, trading via company funds or credit. Alternatively, they can also work for themselves, trading with their own credit or money. In this case, they can keep their profit to re-invest or achieve financial goals

What Is **Forex** !

Forex is one of the most enormous and liquid markets around the globe. In 2010, the forex market accounted for more than 3 trillion dollars of daily trading. Over the last decade, a 40% increase in the daily volume of forex trade with 6.6 trillion Dollars each day is seen. This marks a nine-year peak since 2010. But the surprising fact is that the market did not exist a century ago. Unlike the stock market, we cannot trace the roots of the forex market.

GLORIOUS

FOREX TRADING

How Does Forex Trading Work?

- Forex trading works like any other transaction where you are buying one asset using a currency. In the case of forex, the market price tells a trader how much of one currency is required to purchase another.
- For example, the current market price of the GBP/USD currency pair shows how many US dollars it would take to buy one pound.

Crypto Trading & Share Market

+ CRYPTO TRADING

Cryptocurrency trading is the act of speculating on cryptocurrency price movements via a CFD trading account, or buying and selling the underlying coins via an exchange

+ SHARE MARKET

The share market is a platform where buyers and sellers come together to trade on publicly listed shares during specific hours of the day. People often use the terms 'share market' and 'stock market' interchangeably. However, the key difference between the two lies in the fact that while the former is used to trade only shares, the latter allows you to trade various financial securities such as bonds, derivatives, forex etc.
