# Global Overview Of Fantasy Sports

The global fantasy sports market is expected to grow from US \$ 20.36 billion in 2020 to US \$ 22.31 billion in 2021 at a compound annual growth rate (CAGR) of 9.5 percent. The market research and data service's report added that the fantasy sports market is set to reach US \$ 38.6 billion in 2025 at a CAGR of 14.7 percent.

The rise is mainly due to the increasing youth population, growth in digital infrastructure, availability of affordable smartphones, increasing popularity of players in various sports, growing investment in internet infrastructure, and the launch of fantasy sports applications.

# ***Why People Play Fantasy Sport ?***

## ***Involvement in Sport***

*You may not have previously considered watching less essential matches. However, you may now be playing with one or even more fantasy gamers. You can't attend a match without becoming emotionally engaged if you've had a fantasy squad.*

## ***Manage Players***

*As a fantasy sports participant, you're invested in the squad and the sport as a whole. You use your sense of the sport (e.g., news or sports) for managing your fantasy team's decisions. And these behaviors have ramifications.*

## ***The Prestige***

*It's all about the prestige in fantasy sports. You wish to battle against your friendly league opponents and defeat them (friends, colleagues, family). Fantasy sports are fundamentally social because of this dynamic.*
