What Is Trading?

The term trading is simply referred to as buying and selling securities to make money on daily price changes. If you want to trade in the share market, you should have a good grasp of the fundamentals of share trading. Investing is very much essential these days as savings alone is not adequate to beat inflation and fulfil all our financial goals.

There are several investment opportunities available, and you can choose them as per your needs and convenience. It involves vigorous participation in the financial markets in comparison to investing, which primarily works on a buy-and-hold strategy.

COPY TRADING

- Copy trading can be a good option for beginners who want to enter the financial markets without much experience. It can help them gain access to experienced traders, reduce the learning curve, and diversify their investment portfolios.
- Copy trading is a portfolio management strategy that involves copying the trades of other traders. It's a type of social trading where one trader's account copies another trader's positions when they open or close. Copy trading can be done manually or automatically, and the trader can decide how much they want to invest. For example, if a trader they're following buys 50 shares of a stock, the copy trader will also buy 50 shares of that stock.
