ABOUT FOREX TRADING

Forex (FX) is a portmanteau of the words foreign [currency] and exchange. Foreign exchange is the process of changing one currency into another for various reasons, usually for commerce, trading, or tourism.

The foreign exchange market is where currencies are traded. This international market's most unique aspect is that it lacks a central marketplace.

Instead, currency trading is conducted electronically (OTC). This means that all transactions occur via computer networks among traders worldwide rather than on one centralized exchange.
