Company's Registration & Certificates

COMPANY PROVIDE A DATACENTRES AND CLOUD SPACE

Shoot Space

A data center is a physical facility that organizations use to house their critical applications and data. A data center's design is based on a network of computing and storage resources that enable the delivery of shared applications and data. The key components of a data center design include routers, switches, firewalls, storage systems, servers, and application-delivery controllers.

COMPANY RENTS OUT FURTHER CLOUDSPACE

INTERNET, SERVERS & DATA CENTER

The Internet is a vast network that connects computers all over the world. Through the Internet, people can share information and communicate from anywhere with an internet connection. A server is a computer program or device that provides a service to another computer programmed user, also known as the client. A data centre is a building, a dedicated space within a building, or a group of buildings used to house computer systems and associated components, such as telecommunications and storage systems.

FUTURE OF DATA CENTER IN INDIA

This study focused on learning the Importance of data center

The screenshot shows the MeitY website interface. At the top, there are navigation links for 'Learning', 'Articles', and 'News'. A search bar and a 'Sign up/Sign In' button are also visible. The article title is "'India can emerge as a global leader in data centre and cloud,'...". Below the title, it says 'MeitY | 4 Min Read | May 29, 2023'. The main text begins with 'The panel which participated in this discussion featured some of the stellar names in India's tech governance and industry, such as Neeta Verma- Director General of National Informatics Centre at MeitY, Sridhar Vembu- CEO and founder of Zoho Corporation, Rahul Sharma- President, AWS India South Asia, and Suresh Rathod- President Colocation Business at CtrlS Datacenters Ltd.' At the bottom, it says 'Published By : Ministry of Electronics and Information Technology (MeitY)'.

The screenshot shows a Wikipedia article titled 'Data centre industry in India'. The article text states: 'India has growing data centre industry. Data centers are used for national security, internet infrastructure, and economic output. As of 2022, India's data centre capacity is at 637 MW in 2022 which is expected to be 1318 MW by 2024. The data centre industry is valued at US\$1.2 billion in 2021, a 216% growth from \$385 million in 2014. The number of data centres in India is 138 as in March 2022. India ranks 13th globally in terms of highest number of data centres.^[1] As of 2021, Indian data centers occupy over 8 million sq ft area. 60% of total data centres are in Mumbai, Chennai, Delhi and Bangalore.^[2] India's data centre capacity is expected to double to 1318 MW by 2024 and 183 data centres by 2025.^[1]

The screenshot shows a news article from 'THE TIMES OF INDIA' with the title 'Govt mandates telcos to keep call data, internet usage record for minimum 2 years'. The article is dated 'PTI | Updated: Dec 24, 2021, 13:11 IST'. Below the title, there are social media sharing icons for WhatsApp, Twitter, Facebook, LinkedIn, Email, and a menu icon. The main image shows several telecommunications towers against a blue sky. The text of the article reads: 'NEW DELHI: Department of Telecom (DoT) has extended the duration of archiving call data and internet usage records of subscribers to two years from one year due to security reasons. The amendments in the licences were issued on December 21 and extended to other forms of telecom permits on December 22.'

This study focused on learning the Importance of data center

FUTURE OF DATA CENTER IN INDIA

Number of Data Centers by Country

Country	Number of Data Centers
United States	2,701

2021	216
2022*	212
2023*	222

Our start-up have already storage of 1 lac of TB in our premises

SALE AND LEASE- BACK (SLB MODEL)

We own, operate and manage our data centres, and rent them out to our clients, the continued use of these assets generates revenue for us. In the sale and leaseback model, the seller sells its own property to the purchaser, and immediately thereafter, the seller's marketing affiliate leases back the property from the purchaser on a long-term basis. The sale agreement and lease agreement are executed simultaneously. The seller is responsible for the property's insurance, maintenance, and operation.

We are offering to sell our assets to the purchaser and propose paying a fixed monthly rental on those assets that the purchaser may buy from us.

We are not an investment company, we do not ask for deposits or loans from the public
