

WELCOME TO

THETA MAINNET COIN 3.0

GET STARTED

INTRODUCTION

Theta Labs launched its native blockchain purpose-built for peer-to-peer video delivery in the Spring of 2019. With Mainnet 2.0 in May 2020, we introduced Guardian nodes, a revolutionary, two-layer consensus mechanism [1, 2] to complement its Enterprise validators run by a premiere set of global partners including Google, Samsung, Binance, Blockchain.com, and Gumi.

Following Mainnet 2.0, the capability of the Theta Edge Node network was significantly enhanced with the release of Theta's latest peer-to-peer www.thetafintech.com "EdgeCast" technology.

● OPPORTUNITY

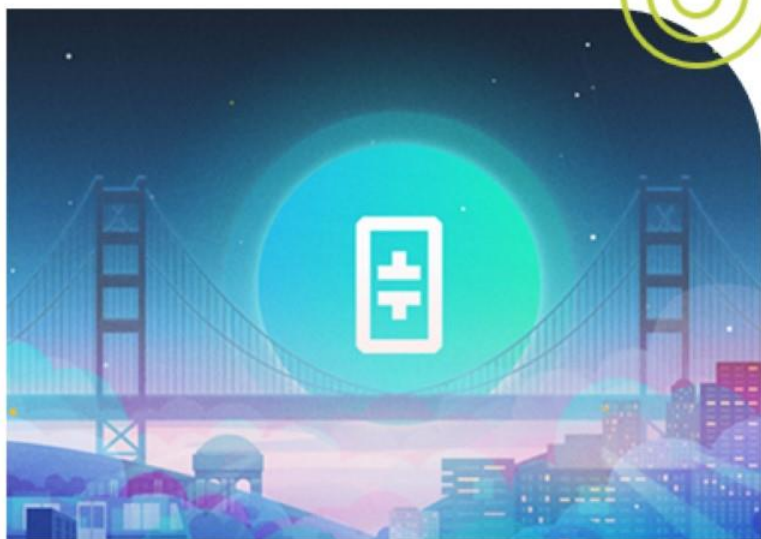

The cryptocurrency space is growing quickly. The number of cryptocurrencies in existence has grown by 63%, the total market cap has grown by 875%, and the average daily volume has grown by a staggering 3,259% year on year. Right now, crypto trading represents 23% of all cryptocurrency trading in the world.

We believe this share will grow substantially in the near future as Bitcoin becomes a reserve currency of the crypto economy, and most trading will be done between Bitcoin and other cryptocurrencies.

If we exclude all other trading pairs and only focus on Bitcoin trading against other cryptocurrencies, the numbers start to support our predictions even more. Looking only at Bitcoin volumes, 43% of all trading around the globe is already done against other cryptocurrencies and only 57% is traded against fiat currencies. We believe this trend will only intensify over time, and fiat trading will soon represent less than half of all trading volume.

The background features two smartphones. The left one is smaller and shows a blue square with a white plus sign and a minus sign. The right one is larger and shows a blue square with a white plus sign and a minus sign inside a white rectangle. There are also some green and blue circular patterns in the background.

THETA with the motive to provide the world with ease of using cryptocurrencies THETA crypto-to-crypto markets and crypto-to-fiat markets are also available for everyone around the world. Global Trading with multiple currencies with cryptoandfiat.

THETA NETWORK COIN

Theta Network is a decentralized video delivery network powered by blockchain technology. The Theta Network Coin (THETA) serves as the native cryptocurrency of the Theta Network, facilitating transactions and incentivizing users to share their redundant computing and bandwidth resources to relay video streams to others on the network.

THETA aims to improve the efficiency of video streaming, reduce costs for content delivery, and enhance the overall streaming experience for both content creators and consumers.

“

WHY THETA NETWORK COIN WAS FORMED ?

Media And Entertainment Companies Face A Number Of Challenges Today. The Streaming Wars Are Leading To Increased Competition, Decreased Profits, And Declining Subscriber Numbers. On The Other Hand Users Are Burned Out By Too Many Subscriptions And Too High Costs. Blockchain Monetization Models Using Nfts Or Tokens Can Package And Gate Content In Creative New Ways That Serve Better For The Content Owner/Creator And The Consumer, Breaking The Cycle Of Bad User Experience.

Theta Cryptocurrency Was Formed In 2017 By Mitch Liu And Jieyi Long. It Aims To Revolutionize The Video Streaming Industry By Incentivizing Users To Share Their Bandwidth And Resources.

WHAT IS MAINNET COIN ?

Theta Mainnet Coin Is The Native Cryptocurrency Of The Theta Network, A Decentralized Video Delivery Network Powered By Blockchain Technology.

Theta Mainnet Coin Is Used For Various Purposes Within The Network, Including Incentivizing Users To Share Their Redundant Bandwidth And Resources To Improve Video Streaming Quality And Reliability.

● THETA METACHAIN **BLOCKCHAIN**

Theta Metachain is an interconnected network of blockchains, a “chain of chains”. It will allow permissionless horizontal scaling of the Theta blockchain network in order to achieve potentially unlimited transactional throughput and subsecond block finalization time.

This enables a customizable, highly scalable blockchain tailored for emerging Web3 businesses in the media and entertainment space.

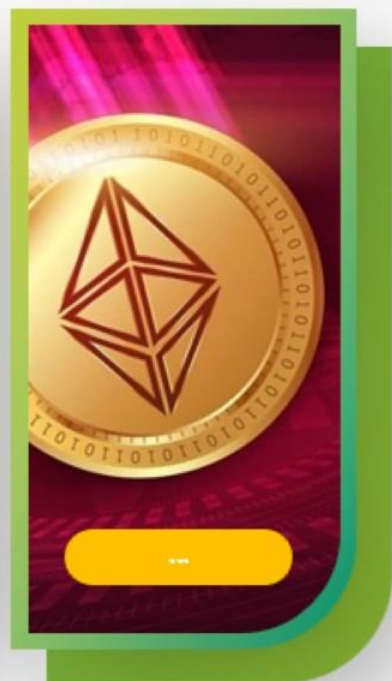

● WHY THETA NETWORK COIN WAS FORMED ?

Media and Entertainment companies face a number of challenges today. The Streaming Wars are leading to increased competition, decreased profits, and declining subscriber numbers. On the other hand users are burned out by too many subscriptions and too high costs.

Blockchain monetization models using NFTs or tokens can package and gate content in creative new ways that serve better for the content owner/creator and the consumer, breaking the cycle of bad user experience. Theta cryptocurrency was formed in 2017 by Mitch Liu and Jieyi Long.

It aims to revolutionize the video streaming industry by incentivizing users to share their bandwidth and resources.

WHAT IS MAINNET COIN ?

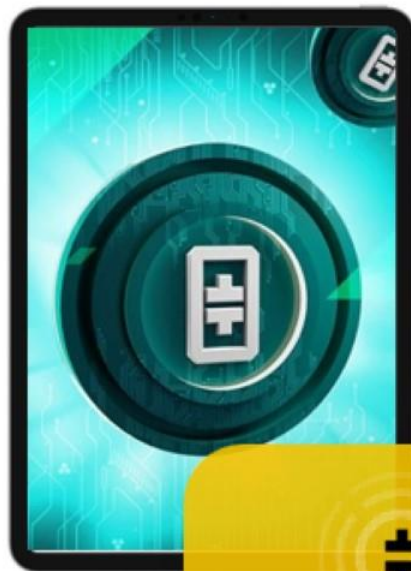

Mainnet coin typically refers to a cryptocurrency that operates on its own native blockchain network. When a cryptocurrency transitions from a test network (testnet) to its official, fully functioning blockchain, it's said to have launched its mainnet.

Mainnet coins are the actual tokens that can be bought, sold, and used for transactions on the network. Examples include Bitcoin (BTC), Theta, Ethereum (ETH), and many others.

● THETA MAINNET COIN

Theta Mainnet coin is the native cryptocurrency of the Theta Network, a decentralized video delivery network powered by blockchain technology.

Theta Mainnet coin is used for various purposes within the network, including incentivizing users to share their redundant bandwidth and resources to improve video streaming quality and reliability.

The graphic features a dark blue background with a grid pattern. In the center, there are three concentric circles: a dark blue outer circle, a teal middle circle, and a dark blue inner circle. Inside the inner circle is a glowing cyan square with rounded corners, containing a white plus sign and a white minus sign. To the right of the inner circle is a yellow rectangular shape. At the bottom left of the entire image, there is a white arrow pointing upwards.

THETA BLOCKCHAIN

Theta Blockchain is a decentralized video delivery network powered by blockchain technology. It aims to improve video streaming by incentivizing users to share their excess bandwidth and computing resources.

Theta's native cryptocurrency, Theta Token (THETA), is used to reward participants for sharing their resources and to facilitate transactions within the network.

Theta aims to reduce the costs of delivering video content, improve stream quality, and increase engagement for content creators and viewers alike.

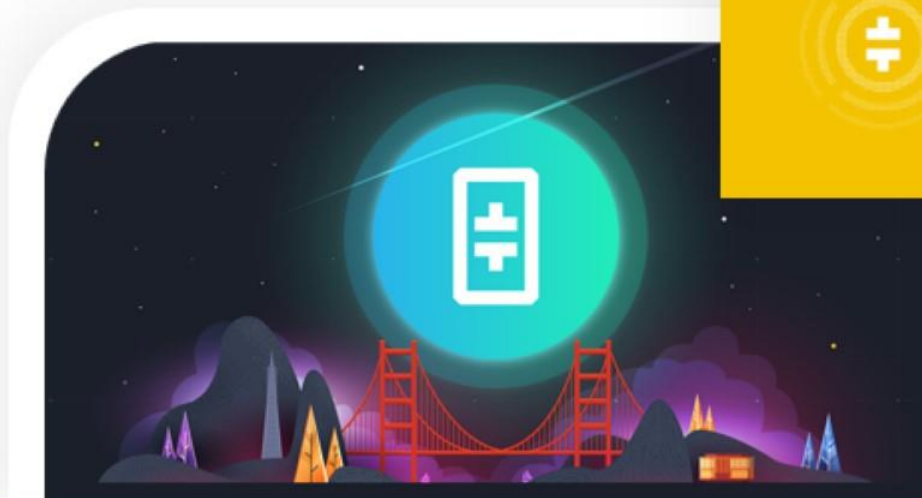

● WHAT IS THETA EDGE NODE PROGRAMME ?

The Theta Edge Node is the latest evolution of the Theta Edge Catcher.

The Edge Node turns your computer into an edge computing node which can execute various types of jobs including AI/deep learning model training and inference, as well as video trans coding and relaying.

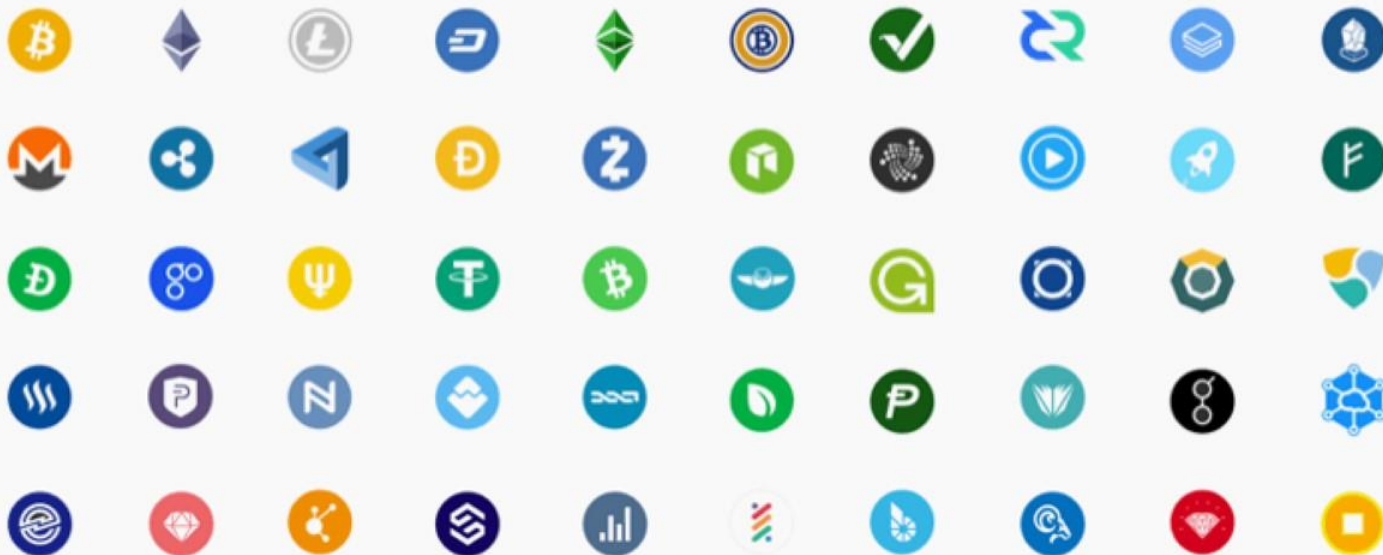

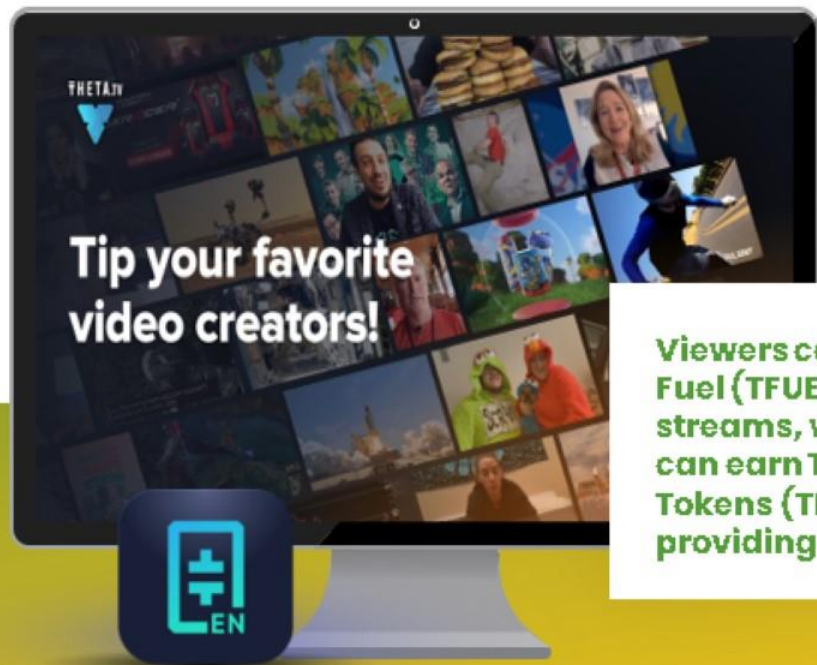

The Theta Edge Node is the latest evolution of the Theta Edge Catcher. The Edge Node turns your computer into an edge computing node which can execute various types of jobs including AI/deep learning model training and inference, as well as video transcoding and relaying.

● THETA TV

Theta.tv is a decentralized streaming platform powered by blockchain technology. It allows users to watch, stream, and earn cryptocurrency rewards through their participation in the platform.

Viewers can earn Theta Fuel (TFUEL) by watching streams, while streamers can earn TFUEL and Theta Tokens (THETA) by providing content.

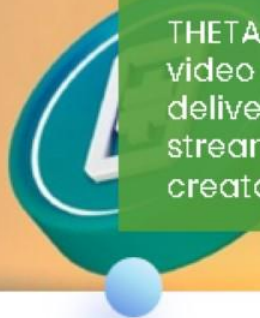

Theta.tv aims to improve the efficiency of streaming and create a more fair and transparent ecosystem for content creators and viewers alike.

● THETA COIN

Theta Network is a decentralized video delivery network powered by blockchain technology. The Theta Network Coin (**THETA**) serves as the native cryptocurrency of the Theta Network, facilitating transactions and incentivizing users to share their redundant computing and bandwidth resources to relay video streams to others on the network.

THETA aims to improve the efficiency of video streaming, reduce costs for content delivery, and enhance the overall streaming experience for both content creators and consumers.
