ABOUT US

WINMULTIPLE

Welcome to WINMULTIPLE , where innovation meets the future of finance. Founded in 2024, we are a pioneering force in the realm of digital currency, dedicated to revolutionizing the way people perceive and interact with money.

At WINMULTIPLE, we believe in the power of blockchain technology to democratize finance, empower individuals, and foster global economic inclusion. Our team comprises visionary thinkers, blockchain experts, and financial professionals united by a common goal: to create accessible, secure, and transparent financial solutions for the digital age.

10+
YEARS OF
EXPERIENCE

Vision & Mission

“

The aim of **WINMULTIPLE** is only to make people not only invest but also keep their money in their exchange without giving false information to them so that they can generate maximum profit.

History Of Our Currency

Barter is an act of trading goods or services between two or more parties without the use of money –or a monetary medium, such as a credit card,digital currncy In essence, bartering involves the provision of one good or service by one party in return for another good or service from another party.

Make Your Crypto Transactions Easier

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology a distributed ledger enforced by a disparate network of computers. A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.

Currency Revolution

Evolution Of Crypto Currency

WHAT IS CRYPTOCURRENCY?

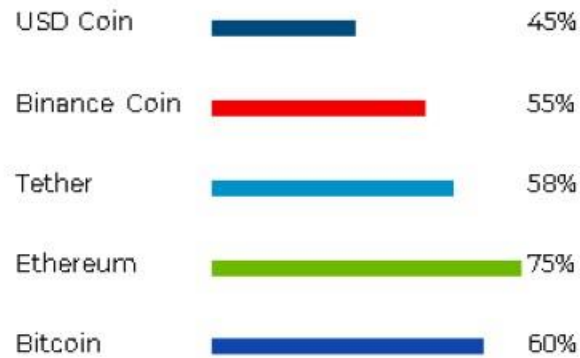

Cryptocurrency markets are decentralized, which means they are not issued or backed by a central authority such as a government. Instead, they run across a network of computers. However, cryptocurrencies can be bought and sold via exchanges and stored in 'wallets'.

Unlike traditional currencies, cryptocurrencies exist only as a shared digital record of ownership, stored on a blockchain. When a user wants to send cryptocurrency units to another user, they send it to that user's digital wallet. The transaction isn't considered final until it has been verified and added to the blockchain through a process called mining. This is also how new cryptocurrency tokens are usually created.

CRYPTOCURRENCY TRADING

Cryptocurrency trading is the act of speculating on cryptocurrency price movements via a CFD trading account, or buying and selling the underlying coins via an exchange.

Cryptocurrency trading is the buying and selling the underlying coins via an exchange

Is trading crypto profitable? Day trading the cryptocurrency market can be a very lucrative business because of the high volatility.

How does Global Matrix 6 work?

LET'S KNOW HOW IT WORKS

As soon as you get 2 I'd on the first level, it gets your upline income and you get the income of 3 4 5 I'd on the second level, 6 I'd gets recycled.

This is the activation of the same matrix as the previous matrix. Fills completely. It is best to do this automatically immediately after closing the previous one, so as not to reduce income. Therefore, in the old scheme, this is the only possible.

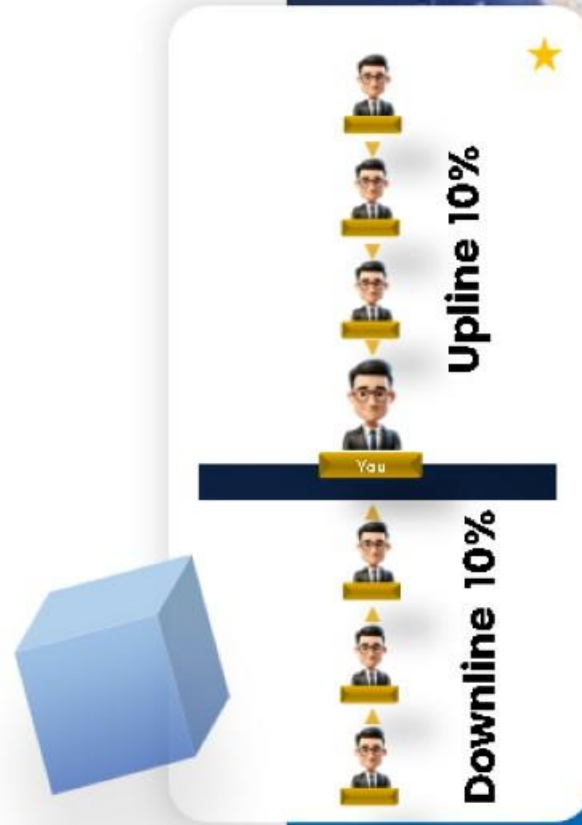

WELCOME BONUS

NON WORKING 20%

Global welcome bonus:

If you join from somewhere and upgrade then you will get **10%** from 10 upline and **10%** from 10 downline again and again.
